

Emmanuel Adejoh

Full Stack Developer

adejorion@gmail.com | Nigeria | github.com/emmyade360

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive web applications, backend APIs, and scalable product features using React, Node.js, MongoDB, PostgreSQL, and Go. Skilled in translating ideas into reliable digital products, collaborating across teams, and delivering user-focused solutions with clean frontend and backend integration.

TECHNICAL SKILLS

Frontend: React, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion, Zustand, React Query, React Hook Form, Zod, Vite, Lightweight Charts

Backend & Databases: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Firebase, Supabase, Firebase Admin, Nodemailer, Go (Golang)

AI & APIs: Anthropic Claude API, OpenAI SDK, Groq, Cerebras, Cloudinary, Web3Forms

Blockchain / Web3: bitcoinjs-lib, TronWeb, BIP32, BIP39, tiny-secp256k1

Tools & DevOps: Git, GitHub, Docker, Vercel, Netlify, Cloudflare, Cloudinary, Datadog, ESLint, Prettier, Jest

CORE COMPETENCIES

- Full-stack web application development
- Responsive frontend implementation
- REST API design and backend integration
- Database design and query optimization
- AI API integration and product features
- Cross-functional collaboration and delivery

EXPERIENCE

Tech Trainee & Software Engineer | MercuryX

Oct 2025 till Present

Working in a dual role that combines active software engineering with structured technical mentorship. I collaborate with the team to build and maintain scalable software systems across the development lifecycle, from planning and implementation to QA and deployment. Alongside engineering work, I lead frontend training sessions for junior developers covering HTML, CSS, and JavaScript with a strong focus on practical skills and real-world confidence.

- Build and maintain scalable software systems across planning, development, QA, and deployment.
 - Support frontend training sessions for junior developers in HTML, CSS, and JavaScript.
-

Backend Training | Learn2Earn

Nov 2025 to Dec 2025

Completed backend training focused on Golang, strengthening my understanding of API development, backend architecture, and writing efficient server-side logic. The program helped sharpen my problem-solving approach and gave me more hands-on confidence building backend services with Go.

- Strengthened backend development fundamentals through focused Golang training.
- Practiced building backend logic and understanding API design with Go.

Full Stack Developer | Vivaking Technologies

March 2025 to Nov 2025

Built and maintained full-stack web applications using React, Node.js, and MongoDB, turning product ideas into smooth, user-friendly experiences. I worked on responsive interfaces, backend APIs, and data flows while collaborating with the team to ship reliable features and improve overall product performance.

- Built responsive user interfaces and connected them to backend services and data workflows.
- Developed and maintained APIs and application features that improved product reliability and usability.
